DEFRA (Ref: MO43) For Weather Forecast Planning Issued on Friday, 28 May 2021 at 04:08 local time

Air Quality Forecast for the UK

Issued by the Met Office

Today: Air pollution levels will be predominantly Low across the UK, although an isolated pocket of Moderate pollution is not impossible.

Tomorrow: Air pollution levels are expected to remain largely Low on Saturday. However, the warm and sunny conditions may trigger some Moderate areas in western parts of the country, Wales in particular.

Outlook: Little change, with Low air pollution overall. Some Moderate pollution may persist in parts of England and Wales, thanks to the warm and sunny conditions persisting over the Bank Holiday weekend.
